[Principle 1.4 Cross-shareholdings]

The Company may hold, as cross-shareholdings, shares of companies that it deems necessary for the purpose of maintaining and strengthening business relationships. Currently, the Company does not hold any listed shares as cross-shareholdings. However, if and when it comes into possession of any cross-shareholdings, including unlisted shares, these shareholdings are examined in detail at meetings of the Board of Directors every year on whether the purpose of ownership for individual cross-shareholdings is appropriate, whether the benefits and risks associated with these holdings are commensurate with the cost of capital, etc., to verify the suitability of cross-shareholdings. This year, at the Board of Directors meeting in June, after clarifying the number of shares, acquisition prices, book values and market prices for each issue, the Company, having deliberated on the suitability of cross-shareholdings from the above viewpoints, has decided to maintain the cross-shareholdings (unlisted shares) it deemed significant and rational. The Company's policy for determining the remuneration, etc., of individual directors is as follows.

1. Basic Policy

The Company secures and retains exceptional human resources who can help realize its corporate philosophy, and can be motivated to adequately perform their expected role in an effort to continually enhance corporate and shareholder value. Specifically, the remuneration of directors in charge of business execution comprises basic remuneration, performance-linked remuneration, and stock-based remuneration (Board Benefit Trust), while the remuneration of outside directors and directors who are members of the Audit and Supervisory Committee, who fulfill oversight functions, only consists of basic remuneration.

In addition, to establish sufficient accountability to shareholders and other stakeholders, the Company ensures rationality, objectivity, and transparency in the remuneration contents and determination process.

2. Policy to Determine Amount of Basic Remuneration, etc., for Individual Directors, Timing of Payment, and Conditions for Payment

The basic remuneration is a fixed, monthly, monetary remuneration. The amount of the basic remuneration is determined by adding the position allowance and role allowance in accordance with the position and role of the director to the amount specified in the basic salary table applicable to directors, and is paid at a fixed time each month. A basic salary table is determined for each director, and is reviewed as necessary based on factors such as annual evaluations and number of years served.

3. Policy to Determine Performance Indicators for Performance-linked Remuneration, Remuneration Amount and Calculation Methodology, Timing of Payment, and Conditions for Payment

To raise motivation to contribute to the enhancement of business performance in each fiscal year, the Company pays its directors who are in charge of business execution a director bonus that comprises a profit-share-based component derived from consolidated ordinary profit and a target-based component derived from consolidated revenue, consolidated operating profit, and annual individual director evaluations. The remuneration is paid each year at a fixed time following the conclusion of the general meeting of shareholders.

4. Policy to Determine the Contents of the Stock-based Remuneration, Remuneration Amount, Timing of Payment, and Conditions for Payment

To ensure its directors share a sense of value with its shareholders, and encourage them to continue enhancing corporate value and shareholder value over the medium to long term, the Company grants shares, etc., based on its Board Benefit Trust system to directors in charge of business execution at a fixed time after their retirement. The number of shares granted corresponds to the cumulative total of the annual share issuance points granted in accordance with the position of directors.

5. Policy to Determine the Ratios of the Amounts of Basic Remuneration, Performance-linked Remuneration, and Stock-based Remuneration, to the Total Amount of Remuneration for Individual Directors

The ratio of remuneration by function of directors in charge of business execution is determined based on the positions and roles of the directors, and on trends at other companies with a business scale comparable to the Company.

6. Matters Pertaining to Procedures for the Determination of the Remuneration, etc., for Individual Directors

The remuneration of all directors (excluding directors who are members of the Audit and Supervisory Committee) is determined by a resolution of the Board of Directors based on deliberations and reports by the Nomination and Compensation Committee, which comprises a majority of independent outside directors.

The highest decision-making body for the execution of our business is the Board of Directors. The Company holds a monthly meeting of the Board of Directors and also arranges other meetings from time to time if necessary. Meetings of the Board of Directors were held on 14 occasions in the fiscal year ended March 2021, and the main issues discussed at these meetings included the closing or opening of pharmacies, budgets and financial results, personnel and labor, the procurement of funds, the establishment of rules, organizational changes, and M&A. The office consists of one department head and three staff members. But if additional individuals are required based on the stipulations of internal audit regulations, a support system that assigns personnel from other departments to the internal audit has been established with the approval of the Representative Director.
